Team Members:

Student ID	Student Name	Role (Product Owner / Scrum Master / Team Member)
IT24101073	Praghnarathna M.A.	Scrum Master
IT24100906	Pinnedoowe R.D.	Team Member
IT24101104	Attanayake H.M.	Team Member
IT24101204	Peiris H.D.T.	Team Member
IT24101767	Hewage D.N.K.	Team Member

1. Problem Identification

Problem Statement:

In the existing environment of teaching, a single teacher controls the registration of the students, attendance, timetables, examination marks, and payment systems in a manual manner, which is more challenging to manage in terms of organization, maintenance, and retrieval of the required information. As the number of students increases, the administrative process of managing all these academic and administrative activities in a manual manner makes the process more difficult and complex.

Furthermore, the communication exchange between the single teacher and the students is unstructured, which is usually done verbally, and important information such as class schedules, examination dates, academic updates, announcements, etc., communicated to the students, which often leads to miscommunication.

Why is this problem important?

- Manually handling increases the workload on the teacher, thereby making it difficult to keep a record of student information related to academics or administration.
- Poor and disorganized communication between the teacher and the student involves misunderstanding, lack of clarity, and consequently negatively affects the learning process and teaching.

2. Stakeholder Identification

List and categorize key stakeholders:

Stakeholder	Type (Primary / Secondary / Tertiary)	Interest / Concern
Teacher	Primary	Efficient handling of registration, verification of payment, attendance, academic record-keeping, and examination of students with less manual workload
Students	Secondary	Receiving timely academic information, accessing class timetables, exam results and announcements

		without any miscommunication
--	--	---------------------------------

3. Product Vision Statement

For A Single Tuition class teacher and students,

Who are affected by manual academic administration and unstructured communication,

The product is an information system that supports the management of academic and administrative activities,

Provides an organized, transparent, and efficient way to manage student information, academic records, payment verifications and communication within tuition classes.

4. Epics

Epic ID	Epic Description
E1	Student Management
E2	Course and Enrollment Management
E3	Class and Attendance Management
E4	Examination and Academic Performance Management
E5	Academic Communication and Activity Management

5. User Stories

Epic ID	User Story ID	User Story	Stakeholder
E1	US 1	As a student, I want to submit my personal details	Student

		through an online registration form so that I can request enrollment in the tuition management system.	
	US 2	As a student, I want mandatory field validation during registration so that I do not submit incomplete or incorrect information.	Teacher
	US 3	As a student, I want to receive a confirmation message after registration so that I know my request has been successfully submitted.	Teacher
	US 4	As a student, I want to view my registration status (Pending / Approved / Rejected) so that I know whether my profile has been accepted by the teacher.	Teacher
	US 5	As a student,	Teacher

		I want my system generated student ID to be displayed once approved so that I can use it for future reference.	
	US 6	As a teacher, I want to view a list of newly registered students so that I can review their submitted details.	Teacher
	US 7	As a teacher, I want to approve or reject student registration requests so that only valid students are allowed into the system.	Teacher
	US 8	As a teacher, I want the system to automatically generate a unique student ID upon approving a student so that each student can be uniquely identified.	Teacher
	US 9	As a teacher, I want to change the student status (Active / Inactive / Suspended)	Teacher

		so that student participation can be controlled.	
	US 10	As a teacher, I want to view students filtered by their status so that student management becomes easier.	Teacher
	US 11	As a teacher, I want to view basic student profile history (last updated date and status changes) so that I can track profile modifications.	Teacher
E2	US 1	As a teacher, I want to create new courses based on grade, subject, and batch year, So that students can enroll in the correct classes.	Teacher
	US 2	As a teacher, I want to create and manage batches for courses, So that students can be grouped properly.	Teacher
	US 3	As a teacher,	Teacher

	I want to approve or reject student enrollment requests, So that only eligible students are enrolled.	
US 4	As a teacher, I want to upload subject materials under each course by month, So that learning content is organized.	Teacher
US 5	As a teacher, I want to verify monthly payment slips, So that access to materials is controlled correctly.	Teacher
US 6	As a teacher, I want to approve or reject monthly payment slips, So that only students who have paid can access the monthly materials.	Teacher
US 7	As a teacher, I want to view a list of students who have paid and not paid for a selected month,	Teacher

	So that I can easily track monthly payments.	
US 8	As a student, I want to request enrollment in a selected course, So that I can attend the relevant class.	Student
US 9	As a student, I want to upload a monthly fee payment slip, So that I can access the subject materials for that month.	Student
US 10	As a student, I want to view the approval or rejection status of my payment slip, So that I know whether I can access the monthly materials.	Student
US 11	As a student, I want to access subject materials only after my payment is approved, So that I can study the content for the paid month.	Student

	US 12	As a student, I want to download subject materials for approved months only, So that I can study offline when needed.	Student
E3	US 1	As a teacher, I want to create a class timetable, So that students know when classes are scheduled.	Teacher
	US 2	As a teacher, I want the system to warn me about time conflicts when creating a timetable, So that I do not schedule overlapping classes.	Teacher
	US 3	As a teacher, I want to view my class schedule, So that I can manage my teaching sessions effectively	Teacher
	US 4	As a student, I want to view my class timetable,	Student

		So that I know when and where my classes are held.	
	US 5	As a teacher, I want to mark attendance for each class session, So that student participation is recorded.	Teacher
	US 6	As a teacher, I want to update or correct attendance records, So that mistakes can be fixed.	Teacher
	US 7	As a student, I want to view my attendance records So that I can track my presence in classes.	Student
	US 8	As a teacher, I want to generate monthly attendance summaries, So that I can analyze student attendance patterns.	Teacher
	US 9	As a student,	Student

		I want to see my monthly attendance summary, So that I understand my attendance performance.	
	US 10	As a student, I want to receive absence notifications, So that I am aware when I miss a class.	Student
E4	US1	As a teacher, I want to conduct examinations for each course and batch, So that I can evaluate student performance.	Teacher
	US 2	As a teacher, I want to edit exams in the schedule, So that I can correct mistakes and keep the exam details up to date.	Teacher
	US 3	As a teacher, I want to delete exams from the schedule, So that I can remove cancelled or incorrect exams.	Teacher
	US 4	As a teacher,	Teacher

		I want to edit marks, So that I can correct mistakes.	
	US 5	As a teacher, I want to view student results, So that I can analyze overall student performance.	Teacher
	US 6	As a teacher, I want to generate a progress report, So that I can monitor student improvement.	Teacher
	US 7	As a teacher, I want to publish exam results, So that students can view their performance.	Teacher
	US 8	As a student, I want to view my exam results online, So that I can track my academic progress	Student
	US 9	As a student, I want to view exam schedules, So that I don't miss any examinations.	Student

	US 10	As a teacher, I want to enter marks for each student, So that academic performance can be recorded digitally.	Teacher
	US 11	As a teacher, I want to conduct exams online, So that students can complete the exam through the system	Teacher
	US 12	As a teacher, I want to give marks for MCQs and essay results after the exam, So that student performance can be evaluated.	Teacher
E5	US 1	As a teacher, I want to create announcements, So that students receive academic updates.	Teacher
	US 2	As a teacher, I want to edit or delete announcements, So that incorrect information can be corrected	Teacher

	US 3	As a student, I want to view announcements, So that I can stay informed about academic information.	Student
	US 4	As a teacher, I want to send messages to students, So that I can communicate instructions and clarifications.	Teacher
	US 5	As a student, I want to send messages to teachers, So that I can ask academic questions.	Student
	US 6	As a teacher, I want to view my message history, So that I can track previous communications with students.	Teacher
	US 7	As a student, I want to view my message history, So that I can track previous	Student

		communications with teachers.	
	US 8	As a teacher, I want the system to record my actions, So that communication activities can be tracked.	Teacher
	US 9	As a teacher, I want to view activity logs, So that I can review who did what and when.	Teacher
	US 10	As a teacher, I want to export or back up announcements and activity logs, So that communication records can be preserved.	Teacher

6. Initial Product Backlog

[Click here to view the backlog of Jira Software](#)

EP 1 - Student Management

User Story ID	Remarks	Estimated Story Points	Estimated Hours	Priority
US1	Create student registration form and store submitted details	5	16	High
US2	Apply mandatory field validation during student registration	3	10	High
US3	Display registration submission confirmation message	2	6	High
US4	Allow students to view registration status (Pending / Approved / Rejected)	3	9	Medium
US5	Display system-generated student ID to approved students	2	6	Medium
US6	View list of newly registered students for review	4	12	High
US7	Approve or reject student registration requests	5	14	High
US8	Automatically generate unique student ID upon approval	3	10	Medium
US9	Change student status (Active / Inactive / Suspended)	2	7	Medium
US10	Filter and view students by status	2	6	Low
US11	View basic student profile update and status change history	3	9	Low

EP 2 – Course and Enrollment Management

User Story ID	Remarks	Estimated Story Points	Estimated Hours	Priority
US 1	Course creation is based on grade, subject and batch year.	5	10	High
US 2	Create and manage batches for courses.	3	6	High
US 3	Approve or Reject student enrollment requests.	3	6	High
US 4	Upload subject materials by month under each course.	5	10	High
US 5	Verify uploaded monthly payment slips.	5	10	High
US 6	Approve or reject monthly payment slips	3	6	High
US 7	View paid and unpaid students for a selected month	2	4	Medium
US 8	Request enrollment in a selected course (Student)	3	6	High
US 9	Upload the monthly payment fee slip (Student)	3	6	High
US 10	View payment slips approval or rejection status.	2	4	Medium

US 11	Access subject materials after payment approval	5	10	High
US 12	Download subject materials for approved months only.	3	6	Medium

EP 3 - Class and Attendance Management

User Story ID	Remarks	Estimated Story points	Estimated Hours	Priority
US 1	Essential for organizing and conducting classes.	8	86	High
US 2	Prevents class schedule clashes.	6	3	High
US 3	Teachers need easy access to their timetable.	3	3	High
US 4	Students must know their daily class schedule.	3	7	High
US 5	Core function of attendance tracking.	8	5	High
US 6	Improves accuracy of attendance data.	5	3	Medium
US 7	Helps students monitor their attendance status.	3	4	Medium

US 8	Useful for reviewing attendance trends.	5	3	Medium
US 9	Supports student self-monitoring.	3	2	Medium
US 10	Helpful feature, but not critical for core attendance tracking.	2	2	Low

EP 4 - Examination and Academic Performance Management

User ID	Story	Remarks	Estimated Story points	Estimated Hours	Priority
US 1		Core feature to organize exams for courses and batches.	8	8	High
US 4		Allow correction of marking mistakes.	5	5	High
US 7		Makes results available to students.	5	5	High
US 8		Students can monitor their achievements.	3	3	High
US 9		Help students avoid missing exams.	3	3	High
US 10		Stores marks digitally in the system.	6	6	High

US 2	Keeps exam schedule information accurate.	5	5	Medium
US 5	Helps teacher analyze overall performance.	4	4	Medium
US 6	Provides academic progress information.	7	7	Medium
US 11	Enables students to sit exams online.	9	10	Medium
US 12	Teacher evaluates MCQ and essay answers.	7	7	Medium
US 3	Removes cancelled or incorrect exams.	4	4	Low

EP 5 - Academic Communication and Activity Management

User Story ID	Remarks	Estimated Story points	Estimated Hours	Priority
US 1	Core function for delivering important academic information to students.	8	7	High
US 3	Students must be able to see announcements to receive academic updates.	3	3	High
US 8	Activity tracking is important for	8	8	High

	accountability and audit purposes.			
US 2	Helps maintain accuracy of announcements but is not as critical as creating them.	4	6	Medium
US 4	Enables direct communication but is secondary to announcements.	6	5	Medium
US 5	Supports interaction between students and teachers for academic purposes.	6	3	Medium
US 6	Useful for reviewing past discussions and maintaining communication records.	3	3	Medium
US 7	Help students refer back to 4earlier messages and instructions.	3	3	Medium
US 9	Mainly for monitoring and review, not required for daily communication.	4	4	Low
US 10	Important for record keeping and backup but not essential for core operations.	7	6	Low

7. Definition of Done (DoD)

A user story or epic is considered Done when:

- All required functionality has been implemented according to the user story.
- The functionality has been tested and works as expected without errors.
- The feature is integrated with the relevant parts of the system.
- Any associated documentation (instructions or logs) is completed.
- The stakeholders' acceptance criteria are satisfied.

Project Quality Maintenance Approach

The quality of the web application will be ensured by focusing on usability, reliability, and maintainability throughout the development process. A user-friendly user interface will be designed to ensure that the single teacher can manage students easily and courses, attendance, examinations and communication without any technical difficulty. Consistent layouts, clear navigation, and readable fonts will be used to improve user experience and reduce mistakes during system usage.

To maintain system reliability and accuracy of data, proper input validation and error handling mechanisms will be implemented across all modules. This ensures that incorrect or incomplete data is minimized and the system behaves predictably under different usage scenarios. The system will also be designed to respond efficiently to user actions, to have a smooth performance even as the number of students and records increases.

Good software engineering practices will be followed to improve system quality and maintainability. The application will be developed using a modular structure, allowing features to be easily updated or extended in future iterations. Clear naming conventions and structured coding practices will be applied to improve readability and reduce complexity. Security considerations, such as controlled access to teacher-only functionalities and secure handling of student data, will also be considered to ensure safe system usage.

The quality of the project will be maintained by clearly understanding each user story before development and implementing features step by step in each sprint. After completing a user story, testing will be done to ensure it works correctly and does not affect other features.

Code will be written in a clear and organized manner, and tasks will only be marked as "Done" in Jira Software after meeting the Definition of Done. Feedback from the supervisor will be reviewed during the sprint reviews and used to improve the system's quality.

Epic-specific DoD

1. Student Management

For Student Registration, Profile Management & Status Control, Epic, a user story or epic is considered done when, in addition to the general DoD:

- Students can successfully register by entering required personal details.
- The system automatically generates a unique student ID for each registered student.
- Teachers can view and verify student profiles before activation.
- Verified students are marked as Active, and unverified students remain Inactive.
- Teachers can update student profile details when required.
- Teachers can change student status (Active / Inactive / Suspended) successfully.
- Student status changes are reflected immediately in the system.
- Only Active students are allowed to access other system features.

2. Course and Enrollment Management (E2)

For the Course and Enrollment Epic, a user story or epic is considered Done when, in addition to the General DoD:

- Teachers can create and manage courses and batches successfully.
- Students can submit enrollment requests, and teacher approval or rejection is reflected immediately in the system.
- Enrolled students are correctly assigned to batches and displayed accurately.
- Teachers can upload subject materials categorized by month.
- Students can upload monthly payment slips, and teachers can verify them.
- Access to subject materials is restricted to students with verified monthly payments.
- Archived or inactive courses and batches do not affect active enrollment or access.

3. Class and Attendance Management (E3)

For the Class Scheduling, Attendance Tracking, and Summaries epic, a user story is considered Done when, in addition to the General Definition of Done (DoD), the following conditions are satisfied:

- Teachers can successfully create and manage class timetables for their assigned subjects and batches.

- The system prevents scheduling conflicts by not allowing overlapping class sessions.
- Teachers can accurately mark and update attendance for students in each class session.
- Monthly attendance summaries are generated correctly based on recorded attendance data.
- Students can view their own class timetables without modification access.
- Students can view their personal attendance records and monthly attendance summaries accurately.
- All timetable and attendance information is displayed consistently for both teachers and students.
- All stakeholder acceptance criteria for class scheduling and attendance management are met.

4. Examination and Academic Performance Management (E4)

For the examinations, mark management and academic reporting Epic, a user story or epic is considered Done when, in addition to the General DoD:

- Teachers can create and manage examinations for specific courses and batches.
- Teachers can create online exams for selected courses and batches.
- Teachers can add online exam questions(MCQ and Essay) and save them correctly.
- Students can attempt the online exam within the scheduled date/time without system errors.
- Students can submit online answers, and all submissions are saved securely in the database.
- Teachers can view submitted answers for each student after the exam.
- Exam schedules are published and visible to relevant students.
- Teachers can add, edit, and save student marks accurately.
- Student results and progress reports are generated correctly.
- Exam results are published and accessible only to authorized students.
- Students can view their exam schedules and results online without errors.
- All examination data is stored securely and displayed accurately.
- Teachers can edit examination details to correct mistakes and update schedules when required.
- Teachers can delete cancelled or incorrect examinations to keep the exam schedule accurate.
- Teachers can input and store student marks in the system, and the records are saved correctly for future use.

- Stakeholder acceptance criteria are met.

5. Academic Communication and Activity Management (E5)

For the Academic Communication, Announcements & Activity Logs Epic, a user story or epic is considered Done when, in addition to the General DoD:

- Teachers can create, edit, and delete announcements for their classes.
- Students can view announcements for the courses and batches they are enrolled in.
- Teachers can send messages to students, and students can send messages to teachers.
- Message history is available to both teachers and students and shows previous communications correctly.
- The system automatically records user actions such as posting announcements and sending messages.
- Teachers can view activity logs that show who performed what action and when.
- Teachers can export or back up announcements and activity logs in a readable format.
- All announcements, messages, and activity logs are stored securely and displayed only to authorized users.
- Stakeholder acceptance criteria for each user story are satisfied.

8. Sprint 1 Preview

Sprint 1 will focus on implementing the core and high priority user stories from each epic, targeting approximately 50% completion of each epic's functionality. The selected user stories establish the essential workflows required for the tuition class management system. The scope may be refined after Sprint 0 review.

Sprint 1 – Planned Work (Epic Wise)

Epic ID	Epic Name	User Stories for Sprint 1
E1	Student Management	• Student registration form creation. • Registration input validations. • Display registration submission confirmation.

		• Teacher approval or rejection of student registration • Student status update to Active or Rejected
E2	Course and Enrollment Management	• Course Creation • Student Enrollment Request • Teacher Approval/Rejection
E3	Class and Attendance Management	• View Class Timetable • Attendance Marking • Class Timetable Creation
E4	Examination and Academic Performance Management	• Add exam schedule • Edit exam schedule • Conduct online exam • Remove exams from the schedule
E5	Academic Communication and Activity Management	• Create announcements • View announcements • Send messages • View activity logs
